

Ideas for Low Celluclast Performance

13.11.2019

Basic Architecture

- Accesses different memory than CPU
- Starting thousands of threads at low costs

Memory Management

```
%\begin{pygments}[numbers=left]{c++}  
# include <iostream>  
  
int main()  
{  
    std::cout << "Hello ,_world!\n"; //\ codeline{Impo  
}
```
